| Bond Name 10 | ↗2.25% | 26.09 | Buy / Sell |

The PFM includes secure authentication using “Face Recognition Engine” from the same Framework, with dynamic QR code generations and other features.

The concept is unique and enables the bank and financial institution to engage the customer with a better understanding of its requirements.

The PFM backend engine App involves real time behaviour Analysis, Transactional analysis and provides contextual advice to customers on financial products and existing portfolio status/accounts.

The UI is all graphical with gamification mode enabling the customer to visually assess and interact with the financial products and services seamlessly.

The application also provides the Visa to Visa and MasterCard to MasterCard payments along with other payments originating from the App.

ONE CLICK
